

# SmartHotSpot data sheet

## Product specifications

- **Product name:** SmartHotSpot
- **Nickname:** SHS
- **PN:** SVP-005-1-xxx
- **Producer:** SmartViser
- **Country:** France
- **Size:** 9x6x3 cm
- **Net weight:** 0.082 kg

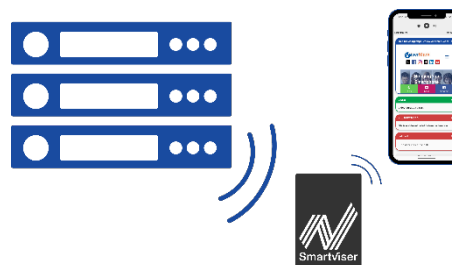

Figure 1. EU Energy Label setup with a network simulator, the SHS and viSer Neo.

## Characteristics

The SmartHotSpot is a hotspot hosting the EU Energy Label media content (reference website, video, webgl, download and upload files) needed to launch tests with a network simulator and viSer Neo .

Configuration	Explanation
SmartHotSpot without ethernet cable	The SHS doesn't provide an Internet connection. The device connected to the SHS can access the EU Energy Label media content locally. However, the licence used to log in viSer Neo cannot be checked without an internet connection.
SmartHotSpot with ethernet cable	The SHS provides an internet connection. The device can access the EEI media content locally and use external links. The licence used to log in viSer Neo can also be checked.
