

viSerBatt

Simple & Automated Solution for Battery Life Testing.

Battery life still remains one of the most important considerations when buying a Smartphone.

viSerBatt application brings a unique and easy way to test the battery life. It allows a real battery life measurement, reflecting the end-user activity, without any programming skill or complex set-up.

With viSerBatt, you gain a professional snapshot of the battery life. Our product encompasses key elements that have been carefully selected for you by our team of experts to achieve a trustable Quality of Experience (QoE) battery life assessment.

We benefit from years of experience by Mobile Professionals (Mobile Network Operators, Device Manufacturers, Ranking Media) from whom we have gained valuable knowledge and gained expertise based on their expectations.

SERVICE GUIDE

Testing User Cases

1. Battery Life Testing

The battery life is key for any product launch. The Battery life assessment, as the end-user will see it, can be easily performed with 6 embedded reference scenarios representing different user profiles. viSerBatt generates real end-user usage (Call, Video Streaming, Gaming, Idle ...) where the battery life and power consumption are assessed in real conditions.

viSerBatt give a regular basis for any verification objective (Marketing team, TAM, R&D, ...). The marketing team may want some real substantial data to create their USP and message for end customers. The R&D team may use it to further refine and fine-tune the battery performance

2. Media Rating Pre-test

We all know that the new product sales success will be highly influenced by reviews from the media. If a device is failing in a key area, then this can have a negative impact on sales. Before submitting a device for review it's key to ensure that reviewers will not discover that a KEY KPI such as the

Battery life is not at the expected level compared with the target price and the competition. Thanks to viSerBatt and the pre-embedded scenario you will be able to pre-Test and get the in advance true battery lifetime, versus any competitor.

3. Operator Acceptance Pre-test

The operator's acceptance test plan always includes as a key acceptance parameter Battery life testing. A large part of the test plan focuses on battery life performance. Carrying out fully automated pre-tests using viSerBatt gives further confidence in the product and secures a smooth device acceptance.

According to the Product range and positioning the most relevant scenario can be used to ensure the best Pre-testing

viSerBatt Set Up

viSerBatt is a simple turnkey solution based on an App easy to install and use on any commercial device. viSerBatt APK will execute 6 pre-embedded scenarios associated with an end-user profile

- Gen Z
- Millennials
- Gen X
- Boomers
- Day of use
- Professionals

viSerBatt can include the VWS option (viSer Web Services) to provide detailed KPI on an interactive web Dashboard

viSerBatt allows you to:

- Execute in a fully automated way any user action (Call, Messaging, Streaming, Browsing, Camera, Gaming, ...).
- Get the Battery life precise duration from 100% to 5%
- Install on any device (competition for instance

Summary

- Automated on any device
- Reliable & Trustable
- No extra footprint
- Easy to use and deploy
- No programming skills needed
